

Cosmic Forever and Ever, No More Divine

Citizens with the Illuminati made the directed energy weapons and citizens with the Freemasons made the Allen Frey based technologies which would have generated the very background noise effect that I heard with my third eye or foresight and soul. So clearly I knew what was happening before hand and that the intense research I did on the subject was crucial to figuring out the problems that were thrown at me by the people here on earth and the governments then every institution on earth with it used as a weapon against me and the very cosmic souled people under my command and watchful self.

It was cosmic vs divine the whole time and to boot the human energies of the divine were mixed with the human energies of the cosmic which means that the Freemasons and Illuminati knew that in order to make the perfect mind control slave they figured they needed energies from both bodies of the cosmic (777th) and the divine (666th) that's why I think these directed energy weapons played a role in the human experimentation process against us cosmic souls. Because the idea I think was to turn the cosmic souls into the slave and the divine into the mind.

Another thing too is that when I like the rest of my cosmic teams on earth went to town on the exiled indigo souls from outer space and celestial Shamabhala we had to eliminate them three ways first and foremost we had to go back in time to eliminate their physical bodies with their soul energies in them by sticking them in black holes which turned them into energy particles instead of sending them down to earth then we had to focus on ejecting them from our bodies as they took residence in us from the directed energy attacks that carried their energies from all over the earth via the electrical and telecommunications grid carried them through wired and wireless sources. Because exiled indigo souls from outer space and celestial Shamabhala carried themselves from the very humanity on earth that they recreated to be used against us so that created an opportunity for us to capture them and break down the energies in them to kill off their energies in the present and then most of teams in the fleet had to go into the future to eliminate them there too. Because they were smart enough to plant themselves in the past, present and future so that if we came back they have their bases covered just in case. Because we have always operated like that too and they figured that operating like that was a good idea.

But that idea wasn't a good idea because they broke the rules of cosmic laws when they went did that in short order but they did it while they were stuck on earth and operating everything out of the atlay's in southern Russia and Northern China as they used the place as a secret black site and a place to crash seeing as their actual physical bodies lived there and they just networked themselves through the human recreations of their own image the divine, aryan race that they originally created to screw us over royally, So at this point doing a damage assessment in the past, present and future and to figure out what things in a specific priority needs to be fixed as soon as possible and what doesn't based on my specifications and from the rest of my teams on earth and beyond the sol system on other colony planets and everywhere else in outer space and deep space. Because aside from the divine trying to put themselves in us to eradicate us which wasn't going to work anyways so reversing the process was a much better alternative than the other way around and that by putting cosmic in the divine versus the divine

in cosmic which was a bad idea. But idea is to replace the system on earth with pure cosmic energy in everybody poor, middle class and rich. But if where going to do that we have to do it carefully so it doesn't compromise us all so there will be different connections in other dimensional ultraverses for the European poor, European middle class and European rich. Separate from our primary ultraverse Shamabhala where Shangri-la us and that's final. Then putting the Arabs in other dimensional ultraverses between Arab poor, Arab middle class and Arab rich that is completely separate from the dimensional ultraverses of the European poor, European middle class and European rich. Separate from our primary ultraverse Shamabhala where Shangri-la us and that's final. Then having the Africans in other separate dimensional ultraverses between African poor, African middle class and African rich which is completely separate from the dimensional ultraverses for the European poor, European middle class and European rich. Then separate dimensional ultraverses for the Arab poor, Arab middle class and Arab rich as well which will be completely separate our primary ultraverse Shamabhala where Shangri-la us and that's final. Then last but not least the Asians will have there own dimensional ultraverses from the European poor, middle class and rich, Arab poor, middle class and rich, African poor, middle class and rich. Where it will be completely separate our primary ultraverse Shamabhala where Shangri-la us and that's final. So that way we can avoid the total fallout of humanity and so it be saved and not be depopulated then another thing too is having this process to be used to turn humanity back to transgendered souled people with completely different biological and physiological attributions from us in our ultraverse of Shamabhala and our home galaxy of Shangria-la where we reside from and will always call home regardless.
